Lecture 26 – Final Project Tutorial: UI Suggestions
& Multi-level access control
+ Course Review & Final Exam Guideline

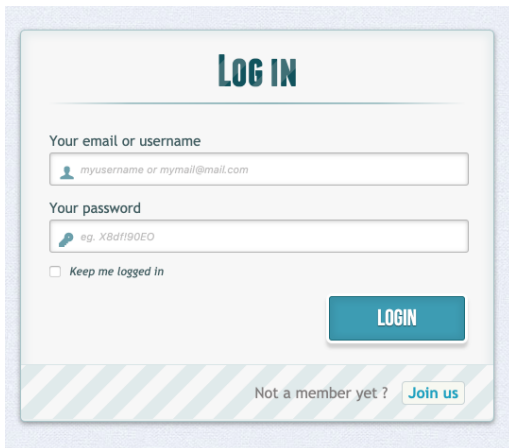

Phu Phung
4/28/2020

Today's Agenda

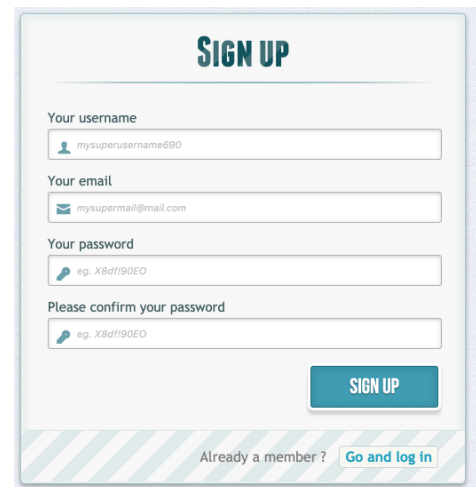

- Final Project Tutorial:
 - Suggestions for UI
 - Multi-level access control
- Course Review
- Final Exam Study Guide
- Grading and course evaluation

Final Project – Suggestions for UI

- You can use online CSS for UI, but you do not need to, however, you need to have basic UI with links
 - E.g., the homepage should allow users to login or click for registering a new account

A login form with a light blue header and a teal 'LOG IN' title. It features two input fields: 'Your email or username' with a user icon and placeholder 'myusername or mymail@mail.com', and 'Your password' with a key icon and placeholder 'eg. X8dfI90EO'. A checkbox labeled 'Keep me logged in' is below the password field. A teal 'LOGIN' button is at the bottom right. A footer bar with diagonal stripes contains the text 'Not a member yet ?' and a 'Join us' link.

A sign up form with a light blue header and a teal 'SIGN UP' title. It features three input fields: 'Your username' with a user icon and placeholder 'mysuperusername690', 'Your email' with an envelope icon and placeholder 'mysupermail@mail.com', and 'Your password' with a key icon and placeholder 'eg. X8dfI90EO'. A fourth field 'Please confirm your password' with a key icon and placeholder 'eg. X8dfI90EO' is below the password field. A teal 'SIGN UP' button is at the bottom right. A footer bar with diagonal stripes contains the text 'Already a member ?' and a 'Go and log in' link.
